Subject: Deeply Flawed Proposal

Who came up with this pitiful proposal? This whole process needs to be redone with input from important stakeholders. Just a quick look at the 2005 plan shows how inadequate and far afield the 2016 plan is by comparison.

At a most basic level the 2016 is not well-written and largely incomprehensible. At a more significant level it fails to deal with placing important controls on protecting land in Wells from development and saving our wetlands.

Therefore I oppose the plan and call on you to form a new committee to do a more responsible job.
