- Revised Special Flood Hazard Area

Note: Elevation contours downloaded from the Maine Geolibary Data Catalog in August 2018. Contour interval is 2 feet.

The AE Zone category has been divided by a Limit of Moderate Wave Action (LIMWA). The LIMWA represents the approximate landward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone and the LIMWA (or between the shoreline and the LIMWA for areas where VE Zones are not identified) will be similar to, but less severe than those in the VE Zone.
